

Vivek Kumar

React Front End Developer

As a fresh face in front-end development, my foundation in the MERN Stack and contemporary web technologies is just beginning. I specialize in creating responsive, visually engaging user interfaces, driven by a passion for learning and growth. Eager to absorb industry trends and embrace best practices, each project is an opportunity for me to infuse creativity and meticulous attention to detail, striving always for excellence.

- Teamwork
- Adaptability
- Time management

PROJECTS

○ [Hectront](#)

Tech-Stack :- React, Tailwind

- Designed and developed a responsive website for Hectront, a company that specializes in 2D/3D modeling, using React and Tailwind.
- Implemented SEO best practices and analytics tools to optimize the website's performance, speed, and ranking on search engines.
- Showcased Hectront's portfolio of projects, services, and testimonials using dynamic and interactive elements.

○ [The Movie List](#)

Tech-Stack :- React, Tailwind, MovieDB API

- Used React and Tailwind CSS to create a user-friendly interface for browsing and searching movies and TV shows from the Movie DB API.
- Implemented features such as pagination, filtering, sorting, and rating to enhance the user experience and functionality of the app.
- Integrated the Movie DB API with custom hooks and axios to fetch and display data from the API endpoints.

○ [Password Genrator](#)

Tech-Stack :- HTML, CSS, JavaScript,

- Developed a web app that generates random and secure passwords using HTML, CSS, and JavaScript.
- Enabled users to customize the password length and character types (lowercase, uppercase, numbers, symbols) according to their preferences.
- Added features to copy the password to the clipboard and check its strength using a progress bar and color indicator.
