- Reading Story
- Coding

Projects

Hectront.com 🌐 🐱

Created a portfolio website for Hectront, a 2D/3D modeling company, using React and Tailwind. Applied SEO and analytics to enhance the website's speed and ranking.

My Role & Responsibilities
I did everything from design to development. I created the website by myself.

Implemented Features :

- **Adaptive and easy-to-use design** with React and Tailwind.
- **Display of the company's services** with descriptions and samples.
- **Contact and social media options** to connect and communicate.
- **SEO and analytics** to boost and measure the website.

Duration : 20 Days.
Tech Stacks: ReactJs | Tailwind |

The Movie List 🌐 🐱

Built a React app with the Movie DB API and Tailwind CSS to enable users to browse and search for movies and TV shows with various features.

Duration : 7 Days.
